He stated that he had no contract with Howard, being employed from month to month at \$100 a month and board. William Wysong, who was employed at Castle Gould in 1903, testified that Mrs. Gould, while "apparently under the influence of liquor, called William F. Murphy a bad name." A couple of weeks later, he swore Mrs. Gould came to the stables and gave him orders. "She smelled strongly of liquof," he declared. Henry Turner who stated that he was employed in the green houses at Castle Gould since 1995, swore that he saw Mrs. Gould under the influence of liquor in the latter part of July or in August, 1996." He declared that she had asked him a question and was so "unsteady on her feet that she swayed and had to hold on to a wall for support."

He also related another alleged instance which happened on November of that year. Mrs. Gould, he testified summoned all of the servants to the estate office and half a dozen times informed them that "I am Mrs. Howard Gould." He characterized her appearance as "unsteady," and insisted that her face "was flushed."

Cross-examined by Shearn the witness stated that they were the only two occasions when he had ever seen Mrs. Gould when she "appeared to be intoxicated."

Turner testified that he had never ing him from building over the line on Stillman street. The injunction was prayed out before Judge F. M. Wilder by Attorney George Kane, yesterday, and the case is returnable to the City Court on the last Monday in June.

Principal Simonds is justly proud of the young men and women to whom he will present diplomas, their number aggregating 103, and their standing being eminently satisfactory. The valedictorian of the class, Miss Bessie Louise Stone, will deliver the formal farewell addresses, in recognition of her excellent scholarship during the

Second in rank, the salutatorian,
Philip Manjoney, will be a figure of interest because of his attainments

Seven years ago, with the words "yes," "no," and "nice" constituting his entire English vocabulary, Philip presented himself at the Washington school on Pequonnock street, where the principal, Miss Mary Walker, assigned him to a class in which he might be instructed in our language and advanced in mathematics, the rudiments of which he had acquired in Italy. In view of several hundred persons Sorenson made an as-cent in a balloon, and then attempt-ed a descent in an aeroplane that he had constructed after several months' labor. when it struck the ground he was in a sitting posture. The aeroplane was demolished, but Sorenson, although knocked senseless and sustaining numerous bruises, was soon revived.

WALL STREET TO-DAY.

(Special from United Press.) New York, June 16.—The most intense market interest at the opening and in the early morning trading was the character of the news from Paris telling of the pressure against the pro-position for dealing in Steel Common on the Paris Bourse and of the move-ment made against it by the Paris financial officials. There was little support in Steel. This morning the first sales were made fully a point below yesterday's close. Interborough Metropolitan preferred advanced one half a point.

11 a. m.—The selling movement inspired by the news in regard to obstacles in the way of installing Steel Common on the Paris Bourse became

more extensive and at times violent all around the room. The opening lesses were followed by general liquidation of speculative accounts, many stop orders being reached on the downward movement while the bear element that commenced aggressive operations yesterday helped along the declines. With few exceptions the declines of one to two points were sustained all through the list.

RUSSIAN SECRET SERVICE OUTDONE BY

(Special from United Press.) Calcutta, June 16.—Evidence developed to-day in the investigation that Governor Frazler is making of the police force which shows that when it comes to persecution, blackmail and murder, the Russian secret service, heretofore believed to be the most heartless in the world, can learn a great deal from the Indian police.

It has been proved that the police have requestly thrown bombs and have frequently thrown bombs and then fastened the crimes on innocent natives in order to exile them or secure blackmail. An unshaken array of evidence has been presented that the police have levied enormous blackmail against rich natives, actually bringing about the exile of a number of citizens who refused to pay their demands. The corruption has continued for a long period, becoming most flagrant following the recent mutiny, until a regular epidemic of oppression and extortion was practiced against

the natives.

The investigation results directly from the expressions of the high court the total bare here here the court the court in justices here in overruling the convic-tion of three natives tried before the Midnapore sessions of the court on the charge of complicity in a bomb plot. In support of their accusation the po-lice offered the evidence of a large number of native informers, produced a bomb which they said they found in the house of one of the prisoners and laid before the court the confession of three of the twenty-six men under ar-rest. At the last moment a number of the prosecution's strongest witnesses admitted that they knew nothing of the case and the accusations virtually collapsed. On appeal it was shown to the satisfaction of the superior tribunal that the police forced the confessions by "third degree" methods and that all e evidence they produced was manufactured.

She did not like his looks. He went away to-ward the Dibble house. The man was of medium height and very stocky. She thought he might weigh about 165 pounds. Mrs. Cassier was asked if she had any theories about the murder.
